Dear readers!

A few minutes ago I Googled a new term, a pluviophile. 'What on earth is it?' you would say. In the urban dictionary a pluviophile (n) is a 'lover of rain, someone who finds joy and peace of mind during rainy days'.

During the heavy rains at the weekend, I was sitting on my terrace listening to rain falling on our terrace roof. Raindrops' dancing and preparing for their next dance move. Indescribable. I love rain. It refreshes and inspires. It gives new power and clears crooked paths. It calms us down. Rain stimulates our mind to bring up new and wash away the old.

And you? Are you a pluviophile, too? If nothing else, after rain there's always the sun, right?

Enjoy your holidays, guys! :)

Your Editor

Sun Day

S F E S T I V A L S The world's day of the sun

The day of the sun is celebrated on the 28 May. Different organizations try to inform people about pros and cons of the sun. Unfortunately, a lot of people don't know the consequences of sunbathing. The ozone hole is getting bigger and if we don't use proper protection we can get the skin cancer. To protect from the sun, we need to drink a lot of water, wear light clothes, wear sunscreen and hats. Children in kindergartens participate in this project, too.

<http://goo.gl/F6iFIO>

To keep yourself hydrated in summer you have to drink plenty of water.

They draw different pictures of the sun, they all dress in yellow on this day and they make yellow hats. Astronomical organization organizes the event where visitors can watch the sun with a telescope. In some pharmacies they inform people about the skin health in summer and how to protect from it. On the festival of creativity, they prepare a craft making afternoon.

<http://goo.gl/YRPrJC>

Sun bread

They play different games, make different crafts and even cook bread which is in a shape of sun.

Some people think that this event is just for kids, but it isn't; many adults join it, too and it's very fun. It's true that sun has a lot of cons but it's got its pros, too. The sun produces vitamin D that is important for our bones and it brings happiness to life.

Eva Konrad, Class 7

Positive sides of the sun:

- more happiness in life,
- important because of vitamin D.

Blažka Grabušnik, Class 7

Negative sides of the sun:

- you can get skin cancer, so you must protect your skin.

It's better for you not to go out between 12 and 4 p.m., because you can get burnt.

There is an important celebration in South Korea connected to Sun Day. It's on 15 April every year. This day is the anniversary of president Kim Il-sung's birth. People celebrate this celebration in the capital, Pjongjang. It's a three-day festival. On the festival people can dance, eat three times a day or more. Three days before this festival they decorate all country. Children go door to door and they are given a lot of sweets.

<http://goo.gl/Js0j3P>

It is important to protect your skin from the sun.

1. How and when did you start to write?

From the early childhood it was my wish to write, but I didn't know how to start and I started to occupy myself with a thought of mountain climbing. After finishing the national service I just forgot about writing. And then I started to write when we went on Everest, so we made a deal that we had to write about that expedition and I seized the opportunity. I was 33 years old then and I was journalist, but I last wrote about 10 years ago.

2. Have you always been interested in mountain climbing or did you prefer any other sports?

I'm from here, Lenart, but there aren't any rocks here and I remember driving to Ptuj when I was a child; there were rocks and I loved to watch them. I have driven by recently and there aren't any rocks any more, just some sandpits. In school I was interested in football and other things, I played for Lenart and Maribor Branik and I wasn't so fast, so ...

3. What encouraged you to start writing?

Writing is creation. The most fascinating in writing is the fact that you don't need anything, only your brain and experience. You just sit, write and you create something beautiful. I understand mountain climbing the same. Over and over again it makes me happy to climb new mountains; you go to a rock wall and adjust to it, it's same in writing - you think that you are free at the start, but you aren't.

4. What was crucial for writing your novel *Svinjske nogice*?

I had a friend who was a comic book writer and a tattoo artist and he told me how he bought pig legs to train his tattoo skills on. But the novel actually talks about the trouble and pain that an artist has to go through in order to succeed.

Pig legs his friend used to improve his tattoo technique.

5. What can you tell us about your new projects?

I am writing a crime story for some time now, I am currently more than half way done.

Tadej Golob

This one is a lot harder to write than my previous books. Everything has to be spot on, without any mistakes even in the smallest details. I have already talked to many detectives about the process of a detective work and they gave me advice and help that I need to finish this book.

6. What feelings do you have while climbing?

In fact, this joy comes when you're in the valley, but before it it is only one big suffering. I like to climb because you get the feeling of being alive in a way you know you did something good and that you beat your fear. You know you had to train so hard in order not to get fat. But when you once again climbed one goal that you have imagined for 10 years, of course it feels very good. But there were a lot of failures as well.

7. What do you think is harder, writing books or climbing?

I think both is hard, each in its own way. You can also fail at both. The only thing that's better is you can't get hurt when you write books.

Dear Mr. Golob, thank you for cooperation and all the best with your future climbing and writing!

<http://goo.gl/pbzCDS>

*Anja Krautič and
Gregor Sulcer, Class 9*

Ibexes

DESCRIBING ANIMALS

Ibexes

My name is Nika and I will present you very interesting animals: ibexes.

Ibexes are wild goats. Their body is one and a half metres long. They have got four strong but short legs and one short tail. Their fur is red-grey in summer, but it is yellow-grey in winter. Males and females have got long, curved horns; males' are longer and stronger. They use them for territorial defence and sexual selection. Males have long beards. Adult ibexes are 26-92kg heavy.

Male ibexes have long beards.

<https://goo.gl/Zw5Mgf>

Ibexes live in groups called herds. Older males are solitary animals. They sleep in the afternoon and at night, but they eat in the morning and in the evening. Their food is vegetation, such as grass, bushes, shrubs and herbs. They drink water. They can move and jump in the mountains very well. They jump from two to four metres high, but they can't swim and fly because they haven't got wings.

Ibexes are good jumpers.

<http://goo.gl/eBEUCD>

<http://goo.gl/nzqxR>

We have got an ibex in horoscope. We call it a capricorn. I am a capricorn, because I was born on the twenty-fourth of December.

Ibexes live in the mountains about 1700 metres high. In winter they come down to the forests because they haven't got any food in the mountains. In Slovenia we can find them in the Alps. There are more ibexes in the north central Asia and northern Africa. They make their homes on cliffs.

<https://goo.gl/tK82li>

In this picture we can see ibex's footprints.

Ibexes are fighting.

<http://goo.gl/8kCM5H>

Nika Gamser, Class 7

Monkeys

We know many species of monkeys. They live all over the world in savannahs, in forests and in the trees. Monkeys are usually brown, but their colour varies. They have got a long thin tail or no tail at all. Front legs are longer than the last ones. They have small ears and big eyes. They can weigh from 150 grams up to 180 kilos and can be from 140 millimetres to 1 metre tall. They live from 15 up to 45 years, depending on the species. Their favourite food is a banana. They eat leaves, fruit, flowers, seeds, eggs, nuts and small animals, like insects and spiders. They drink water and babies drink mother's milk because they are mammals. They sleep at night.

Monkeys are mammals.

<http://goo.gl/YcVUMH>

In this picture a monkey is eating a banana.

<http://goo.gl/ywpsf5>

Monkeys can climb a tree and jump, they can also run very fast and swim very well, but they can't fly.

A chimpanzee is climbing a tree.

<http://goo.gl/Xg7xC4>

They look for food in groups. They use their bodies for searching food.

Monkeys are intelligent and very funny animals, but they aren't dangerous.

I am going to present three species of monkeys. One of them are called Central American squirrel monkeys.

They are very small. Squirrel monkeys live in Costa Rica and in Panama in groups. They have orange backs, white and black faces and they can live more than 15 years. They sleep at night.

Squirrel monkeys eat fruits and plants and drink water and milk. They can climb, swim, jump and also run very well. They look for food during a day. They can have one or two babies. Their mothers hold them on their backs and they are the same colour as their parents.

In my opinion babies are very cute.

Chimpanzees live in America, in groups. They have got brown or black fur. They can weigh from 40 to 60 kilos and can be from 130 to 170 centimetres tall. They haven't got tails and they can live from 40 to 60 years. Chimpanzees eat fruits, eggs, nuts, seeds, leaves, honey and flowers and they drink milk and water. They can climb, swim, jump and run, but they can't fly. They can have one or two babies. They are very intelligent and smart.

Gorillas live in Africa and America. They are black. They haven't got tails. They can weigh from 70 to 280 kilos and they can be 2 metres tall.

Gorillas eat leaves, fruits, eggs, nuts. They can run very well, swim, jump and climb, but they can't fly.

A gorilla

Blažka Grabušnik, Class 7

Seasons poems

LITTLE POETS

<http://goo.gl/3FK5H>

Hello, it's Halloween.
There are scary masks
and monsters.
If you are alone
call your friend to trick or treat.
Watch out!
There is a skeleton
behind your back.
You need to carve
jack-o'-lantern or
the witch is going to grab you.

If you don't get any treats
there is time for a trick.
Grab some eggs and toilet paper
and throw it into the house.
You can also scare them,
and this is the point of Halloween,
you need to have fun.

<http://goo.gl/FRKixG>

Spring

Spring is the most beautiful time
of the year.
There we have some planting
flowers,
a lot of rain and St. Patrick's day.

Simon Špindler, Class 7

Spring

How can I know
the spring is here?
Many flowers are blooming there.
The sunlight is shining,
butterflies are flying
from flower to flower
and they fly over the pasture.
It is very beautiful to see,
what is doing the little bee.
So go to the nature,
and enjoy your life!

Nika Gamser, Class 7

Spring

Spring brings to us primroses,
daffodils, violets, daisies and
snowdrops.
Birds are beautifully singing
and they with their songs
announce
that the spring is here.
Butterflies, bees and bumblebees
are flying with luck in their hearts.
No matter how long the winter is,
spring is sure to follow.

Ana Šefer, Class 7

Halloween

Ding, dong, trick or treat,
do you have any candies for me?
Monsters, vampires
and wicked witches
are waiting to scare you away.
Don't be scared
of jack-o'-lanterns.
Be brave, knock on that door.
If you are scared, run back home,
don't come back
or you'll be alone.

Eva Konrad, Class 7

Autumn

Leaves get jazzy,
they dance in the breeze.
The birds go away,
they go to the seaside
and they feel well.
The streets get silent,
the birds aren't whistling.

It is peaceful and quiet,
kids play in the woods,
they jump on the leaves,
it's Halloween, too.

The summer is over,
school starts again.
This isn't good,
but we can't do anything
so nobody else should.

Eva Konrad, Class 7

*"A flower does not think
of competing with the
flower next to it. It just
blooms."*

<http://goo.gl/t5lj69>

Spring

Goodbye winter, hello spring!
We can hear beautiful birds'
singing every morning.
Everything begins to wake up.
Children all over the world start
hiding the eggs.
Snow is on the wane.
Spring brings snowdrops,
primroses, daisies, violets
and daffodils.

Blažka Grabušnik, Class 7

My comic

Our neighbourhood

My town

EVERYTHING The football field is next to the cemetery. The cemetery is between the football field and the church. The church is between the restaurant and the cemetery. Next to the church there is a restaurant called restaurant Špindler. The school is opposite the supermarket. Next to the supermarket there is a post office. The bus stop is next to the school. There isn't a bank in my town and there isn't a bakery either. My town maybe doesn't have a lot of shops, but I like it the way that it is.

Vojko Breznik, Class 6

My town

My town is small. In my town there are a lot of houses. We have got a big square. On the square there is a big church. Every Sunday there is a mass. Next to it there is a home of culture. A bar is opposite the priests' house. A cemetery is behind the church. In my town there is a small supermarket called Mercator. Next to it there is a post office. Opposite the supermarket there is a gas station. In my town there is a primary school, too. Many children go to this school. We go to school by bus. Next to the school there is a bus stop. There are a fire station and a community

opposite the square. There isn't a hospital, but there is a small library in our school. I like my town.

Lara Črnčec, Class 6

My town

In my town we have got a square. On the square there are a church, a cafe, a culture house and Slomšek's house. The church is between the cafe and the home of culture. The Slomšek's house is opposite the church. Next to the square there is a cemetery. We have got two shops. There is a shop with tools. There is a supermarket next to the post office.

A block of flats is next to the school.

Metka Zemljič, Class 6

My town

My town is small. We don't have hotels and sport centres in our town. The school is next to the kindergarten. In our town we have a small supermarket in front of the church, bar and the home of

culture. In our small town we have a fire station, but we haven't got a police station or a music school. In front of the school there is a bus stop. We go to school by bus. In our small town we don't have a lot of buildings, but we are happy here.

Eva Krel, Class 6

My village

My village's name is Jurovski Dol. In the centre of my village there are a small restaurant, shops, a post office, a fire station ... A church is next to the restaurant. There isn't a cinema in my town. There is the school next to the block of flats. There are three markets in my town. There is the football field in front of the brook. There are two cemeteries in my town. There isn't a swimming pool. There isn't a bank in my town. Opposite the church there is the home of culture.

Timotej Eder, Class 6

My room is small. Walls in my room are yellow. In my room I have a desk and it's in front of the window. My wardrobe is next to the bed. In my wardrobe I have clothes and other things. I don't have a TV in my room. On the desk I have books and the computer. In my room I have a chest of drawers. On the wall I have many animal posters. In my room I learn, play the clarinet, sleep, read books and play computer games. I do my homework in my room, too. On the bed I have soft toys and my soft sheets. I love my room.

Martina Kukovec, Class 6

This is my room

In my room I've got a television, a computer, a desk, a chair, a bed, chests of drawers, a lamp and a wardrobe. The computer is on the desk and the lamp is on the desk, too. The television is on the chest of drawers. One of the chests is next to the bed. On this chest there is one of the lamps. My book is next to the desk. The chair is behind the desk. My wardrobe is between the desk and the television and my tablet is on the desk.

Elvis Demšar, Class 6

a small wardrobe. In the small wardrobe I've got jackets and some toys. I have got one small window. Therefore, my room is dark almost all the time, but I don't care, because I've got two lights on the ceiling. In my room I feel very comfortable.

Lara Črnčec, Class 6

My room

In my room there is a bed next to the lamp. The chair is in front of the desk. The chest of drawers is next to the wardrobe. The radio is on the desk. The lamp is between the bed and the cupboard. The globe is on the cupboard. The bedside table is between the bed and the chest of drawers. The blanket is on the bed. The bedside table is opposite the door. The desk is next to the door.

My room

My bed is next to the desk and opposite the wardrobe. There is a poster on the wardrobe. A door is opposite the window. Pencils are on the desk. My school bag is next to the box. A radiator is under the window. Speakers are next to the head phones. My chair is in front of the desk.

Nik Repa, Class 6

My room

I've got a quite big room. Walls in my room are pink. My furniture is dark brown and light pink. In my room there are a bed, two wardrobes, a chest of drawers, a big desk and a shelf. Above the bed there is a shelf. On the shelf there are a snowglobe, four books and two photos of my family. Next to the bed there is a bedside table. On it there is a light. My bed is opposite the wardrobe. In my wardrobe there are clothes, like shirts, T-shirts, trousers, pullowers and jeans. I have got a really big desk. On my desk there are notebooks, a light and some pencils. Next to the desk there is a chest of drawers. In front of it there is my school bag. A mirror is between the chest of drawers and

Rene Bračič-Rajšp, Class 6

Free time

EVERYTHING A PINCH OF

Music trends

My friends and I usually have the same taste for music. We all like rock, rap, pop, folk and I like jazz and classical as well. We all have our favourite musicians and bands that we listen to. Everyone has a smart phone with music on it and he can listen to it any time. We can wake up with music alarms (do not choose your favourite song for waking you up, otherwise you will start hating it. Modern music is quite different from music from the past. We have new musical instruments, different genres of music and other ways to perform them. Since there were no radios or mp3 players back in the day, people had to go to a concert if they wanted to listen to instrumental performances. With new instruments, like electric guitars, rock'n'roll was born, although it didn't exist in the past.

find music that we like today interesting any more.

Fillip Senekovič, Class 9

Computer

I really my computer. It's very useful. You can do everything for school or you can play games on it. I use my computer for a long time, for about 5 years now. When I was younger, I played games on it, but now when I'm older I use it for school projects. If you look for some information, you won't need to read different books. You just type the word in google and you will get the answer in less than a minute. Computers are machines of future. They will become a part of everyday life and our lives will depend more and more on them.

Karmen Breznik, Class 8

Television

I think children shouldn't watch television all the time. They should rather do their homework and study because this is important. If I were you, I would get rid of television because you are an adult in your house.

On the other hand, you may keep it. Maybe children will learn something from documentary films. You have to know that I support you. If you decide to keep it, you should limit the time of watching to one hour a day.

Maja Kukovec, Class 9

<http://goo.gl/rTXtMw>

<http://goo.gl/r5tHvW>

Don't let your children watch to much TV.

But music like opera singing isn't popular any more.

In the future new genres and instruments will be made; this means music will change like it did before and people may not

School in nature

On 9 May we (class 7 from OŠ Jurovski Dol) went to school in nature for five days. We were put up at SŠOD Peca. We were there with OŠ Voličina (class 8).

We were in four rooms: Alenčica, Knap, Berkmandlc and Iberžnik. I was in a room called Knap. There were five more girls in this room: Blažka, Ana, Eva, Rebeka and Tin-kara. We had a lot of fun in our room!

Having fun in one of our rooms

<https://goo.gl/GP1z8v>

When we came to CŠOD Peca, we first learnt rules. Meta was a chief there. We called her Metka. Then we went to our rooms and tidied them. After lunch we had our first activity 'S kompasom po Koroški' We got a map and a compass and we had to find some places on the map. After that, we went to this place. After dinner we had a night hike. However, on our way there the sun was still shining.

On Tuesday we tried a new sport - disc golf. It was very good. I like this sport. It is similar to ordinary golf. When we wanted to play it, it rained, so we weren't happy. Before lunch we made a fireplace and then we lit the fire. We made baked apples and they were delicious. In the evening we prepared for a meeting party. We got acquainted to pupils from OŠ Voličina.

My favourite day was Wednesday. The weather was cool so we had fun. In the morning we went to coal mine called Mežica. What is more, we went there by bike!

On our way to coal mine

<https://goo.gl/ERm7ww>

We cycled about 7 kilometres. It was excellent. After a visit to Mežica, we climbed on a climbing wall. That was not easy at all.

<https://goo.gl/8an8cy>

But in the evening we had a lot of fun! We had an animation evening called 'Naj frizura' (which means the best haircut). Some haircuts were very funny! Our room didn't win, but that isn't important.

<https://goo.gl/yarFnz>

Domen got the award for his haircut.

Thursday wasn't bad either. We were hiking with GPS in the morning and we were exploring animals in the stream in the afternoon. Our clothes were soaking wet. In the evening we had a party with OŠ Voličina. We were dancing and singing songs. The party was from about 8 o'clock p.m. to 11 p.m. We were so tired after that.

On Friday we were tired all day long even though we slept well. We were very happy when we saw sun in the sky, so we could go to Dravograd and we could go canoeing.

<https://goo.gl/mqEnof>

We went canoeing in Dravograd.

We baked sausages for snack.

<https://goo.gl/jCUASN>

However, nobody was happy, because it was time to go home. I will never forget this school in nature. It was the best!!!

Nika Gamser, Class 7

Welcome to Slovenia

EVERYTHING ABOUT PINCH A

Where do Slovenians spend their holidays

Slovenia offers special opportunities for sports activities on holidays and many unforgettable adventures. Most of families in Slovenia go on holidays to Croatia or to other countries in Europe. They usually go in summer but there are holidays in winter, spring and autumn, too. They are shorter, but still long enough. In school we have holidays after one or two months because we need relaxing.

A lot of people spend holidays in Slovenia. You can go to the beach in Piran or to lakes. In Slovenia we have many caves and castles. Here in Slovenia there are many summer festivals and festivals before New Year's Eve. Very popular are museums, too. Popular destinations are 'kobilarna' Lipica or a canyon called Vintgar, a botanical garden 'Volčji potok' and the zoo in Ljubljana.

Volčji potok

<http://goo.gl/PINX6w>

Many people go to foreign countries. Croatia, Italy, Germany and Serbia are popular destinations for Slovenian people to visit. People usually go to these countries with backpacks or camping. Usually they go by car. When people go to Croatia, they usually stay in hotels or they go camping. If they travel to an island they go by special ship that is called a ferry. Ferries can drive cars because they are very big.

For winter holidays people usually stay in Slovenia. In Slovenia there are many mountains. They usually go skiing on Vogel, Rogla, Pohorje, Kranjska Gora and many others. People go skiing to Austria because it is very near to Slovenia. Every year our school organizes a school trip for the fifth class. Normally they go skiing. Hot places are popular among people in Slovenia. They usually go to islands.

Many tourists come to Slovenia. Most of them climb mountains, visit lakes, waterfalls and caves. Many people like to learn new things and they visit castles and museums. The common cities are Ljubljana, Maribor, Bled, Bohinj and many others.

Eva Konrad, Class 7

Slovenia

Slovenia is a country in the middle of Europe. Our neighbouring countries are Croatia, Italy, Austria and Hungary. We have mountains called the Alps, Karavanke and Kamniško-Savinjske Alps. We have sea, too. It's the Adriatic sea. Our official language is Slovene, but the Hungarian language is also official in a small part of north-east Slovenia and so is the Italian language in the south-west part of Slovenia, next to Italy. We joined EU in 2004. Our currency is euro. Our president is Borut Pahor. We also have a lot of lakes, like lake Bled, lake Bohinj ... Lake Bled is very interesting because of its island in the middle of the lake. It has an old castle on it. We also have our own waterfall Savica. We have a lot of hills for skiing, like Pohorje ...

We are famous for our food, too. We have prekmurska gibanica,

blejska kremšnita, kranjska klobasa, kraški pršut ...

<https://goo.gl/nVpF5v>

Slovenia is known for blejska kremšnita.

We are known as a very historical country. That's why there are so many castles, bridges and towers in Slovenia. We have our national park called Triglav National Park and our highest mountain is called Triglav, too. There are a lot of caves in Slovenia, like Postojna, Škocjanske jame ... Škocjanske jame are on UNESCO's list of world heritage. Our country has some festivals, like pust, jurjevo ... I love my country very much!

Gašper Mohorko, Class 8

My country Slovenia

I am from Slovenia. It's a quite young country. It has an interesting history. Before the First World War its land belonged to the Austrian Empire. After the war it was a part of Yugoslavia. For a long time people really liked living in Yugo because it had freedom. But after Tito had died Slovenia didn't feel it should be a part of Yugoslavia any more.

Josip Broz Tito

<http://goo.gl/XkafN>

In 1990 there was a plebiscite to make Slovenia an independent country. The votes were 88.5 percent voting YES, but other countries in Yugo didn't like this and because of that there was a short war for 10 days. In 2004, Slovenia joined the European Union.

Today Slovenia consists of (Lower) Styria, Prekmurje, Carinthia, Upper, Lower and Inner Carniola and on the Slovenian Littoral. The capital city of Slovenia is Ljubljana and it is also the largest city.

Slovenia is a rather 'colorful' country; it has mountains, caves, flat areas and even the sea. The food here is interesting. Prekmurje is known for its prekmurska gibanica, Bled for blejska kremšnita, the Slovenian Littoral for its wine and smoked ham. Slovenia produces a lot of wine, too, especially in Styria.

<http://goo.gl/WLJfNO>

We are very proud of our mountain Triglav, of our caves (e.g. Postojnska jama, Škocjanske jame ...). In Lipica there are these white horses that are also very known, lots of important people have seen them, like the queen of England, Elizabeth II. We celebrate an interesting carnival in Ptuj and Bela Krajina called pust. People dress up into different characters and scare winter away. The most common costume is kurent.

<http://goo.gl/zPnzck>

Slovenia, my country

In the southern Europe, near the Adriatic sea, there lies a small, but wonderful country called Slovenia. There are currently 2.000.000 people living in our country. In the north, our neighbour is Austria, in the south our neighbour is Croatia, in the east Hungary and in the west it is Italy. Our country is divided into 7 regions. The biggest of them is Lower Styria, the second one is Lower Carniola, next there are Upper and Inner Carniola, then comes Slovenian Littoral, next is Prekmurje, and Carinthia is the last. Most of the people who lived in the Carinthia and Prekmurje before the Second World War now live behind the border of Slovenia. We also have some people in Italy. These are called a national minority. Slovenia was labeled as one of the most beautiful countries in Europe. Let's go from the west and then to the south. First of all, our highest mountain is Triglav and it lies in the Alps.

We are very proud of it, and the legend says that you are not a real Slovenian until you climb Triglav. Our second natural wonder is Bled. Blejsko lake is one of the most beautiful lakes in the whole Europe. It is visited from tourists all around the world. Here is also our famous food called blejska kremšnita. Moving on, we come round to Lipica, which is near the the Adriatic sea. It is known for

the most famous horses in the world. We also have our own sea, that we share with Italians. Here lies a wonderful city called Piran. It is known for its fancy hotels, and very nice sea. Not far from the sea we can find one of the most famous caves in the world called Postojna cave. It was and still is visited from famous kings, famous people, and people of all nationalities. Next, we have the capital of Slovenia, our national jewel Ljubljana. This is a very famous and beautiful city that lies near the river Ljubljanica. It is very important for us, mostly because of the Slovenian parliament. Moving on, we come to the city called Novo mesto and near that city there is a birth place of Slovenian potica. It is delicious! If we go up a little bit, we come to the cave of king Matjaž. The legend says he is still sleeping in the cave, and his beard is growing around the table. Now we move to the place where I live, Lower Styria. It is known for Kurent festival every year. We also have our national dish called porridge. If we go to the edge of our country we come to place called Murska Sobota. It is known for its famous gibanica - it is delicious. I love my country and I hope it will grow better in this world.

<http://goo.gl/5uUqJg>

Gašper Waldhütter, Class 8

Love

From my early days of covering my face with a pillow whenever there was a love scene with kissing or moaning and begging parents to change the channel to some action movie, to now when the tables have turned and I find myself at the romance section if I go to the library. There weren't any love at first sight situations as of yet but I do know I don't feel butterflies in my stomach. I feel joy, like nothing else matters any more, all the negativity is flushed away.

<https://goo.gl/W44z5z>

Filip Senekovič, Class 9

We all have been in love ...

or have seen people when they're in love. We usually act like some crazy chicken. We don't know what to say, when to laugh or where to put our hands, either to stand straight or smile ... We always think about her/him. Some people draw hearts in their notebooks. I think that's very sweet - like birds when they try to fly together. Once I saw a boy. He was so pretty and sweet. It was like love at first sight. On the other hand, some people don't think this way, but that's their opinion, not mine. In past, our grand-

parents believed in love at first sight. Boys often visited their 'sweethearts', sent them love letters, flowers, they also sang to them. But times have changed. Boys are too arrogant or too shy to send love letter, they just send you a text message via textbook or, to show their love, they make fun of girls. I think that's very rude. However, in this big world still exist funny, charming and 'old-fashioned' guys. Girls send them a box of chocolates on Valentine's Day. Couples then go on a dinner, watch a movie together, exchange gifts, cards with poems ... I think love can be sometimes hard, but it's worth fighting for it.

Anja Krautič, Class 9

<http://goo.gl/VkQf5>

When you are in love ...

everything is perfect. You feel butterflies in your stomach. When you see the person you are in love with, your heart starts to beat faster, you can't talk; your mind is suddenly full of so many thoughts. A lot of people believe in love at first sight, but I don't really. I think that you should know the person for a little more to love his or her good and bad sides. In past times people went on dates very quickly and they spent a lot of time together. Nowadays a lot of teenagers don't talk so much in person to someone, they text a lot.

Mineja Draškovič, Class 9

I think being in love is ...

a very beautiful thing. People often say that who is in love has butterflies in his stomach and the world suddenly gets better and nicer. A person who is in love is very happy, he smiles and when someone talks about love his face turns red.

I believe in love at first sight. People fall in love if they are meant for each other. That is their destiny and they will stay together for the whole life and they will be happy. In the past finding the love of your life was very tough. Some women had to marry men they didn't like, but their parents told them so. They needed support from their family. They also wrote letters to each others. Sometimes we should also do that because with this you show the person how much you care. Nowadays finding a person is much easier. You can meet your soulmate on facebook or you meet him/her in a big city. If you love him, you should be with him no matter what other people think.

<http://goo.gl/bxPtOq>

When I saw you
I fell in love, and
you smiled
because you knew.
- William Shakespeare

<http://goo.gl/LsKSXZ>

Maja Kukovec, Class 9

Love is strange ...

it's also beautiful and sometimes painful. We start to act and think differently. We don't hang out with friends, talk with our family, study or work. We just talk and spend time with our girlfriend or boyfriend. We can fall in love in many different ways. I honestly don't believe in first sight love because this is silly. You need to know a person and his or her character just a bit.

Love was very different in the past when people just married, lived and had children together. Nowadays love is very special and beautiful, people spend time together, do lots of things and have a great time.

<http://goo.gl/enVaw>

Gregor Sulcer, Class 9

Love is a beautiful thing ...

but sometimes it can also be very cruel. When you are in love you feel that special something in your heart and instantly know you're in love. I believe in love at first sight, because it once happened to me. Still, I think it's not good because you just fall in love with the appearance of that person and you don't really know what he/she likes, what his/her character is like and how that person feels towards you.

In the past people showed love by being kind, listening and support-

ive. In the past the thing that kept two people apart was that they were separated - the poor from the rich and they weren't supposed to be together. Today most of the old traditions continue, but luckily not the one that separates people by how much money they earn or in which family they grow up in. Anyway, you don't need a person to be in love. That feeling of being in love can be your hobby, your passion or even an object that makes you happy.

<http://goo.gl/8b1a4h>

Luka Gomolj, Class 9

Love is an emotion ...

when you love someone. It is a feeling that I feel most of the time. When you are in love you don't think of anything else, just for this one and only person. You want to be with him, live with him and spend every single moment with him, even breathe and die with him. You don't care for other things and the others don't understand you. It is something you can't ignore, just live with it. I don't believe in love at first sight because if you want to love someone, you have to know him and spend time with him (and in future you will fall in love with him). However, it was different in the past. Parents didn't let their daugh-

ter go out with her boyfriend. He had to go to her parents and ask them for permission. Even then they couldn't go out; they had to stay in these parents' house. Nowadays teenage girls go out with their boyfriends and they feel free to spend more time with each others. When you love someone, this is the best thing that has ever happened to you and the best words someone can say to you, are: It's only you and I love you.

<http://goo.gl/v3aci2>

Sanja Bračić, Class 9

<http://goo.gl/n1WSw4>

Love... What is love?

Love is to love someone

for who they are, who they were, and who they will be.

Farewell, my eldest

F A R E W E L L Here we are now,
everything is about to change.
A chapter is ending,
but the stories have just begun,
a page is turning for everyone.
We always knew
this day would come.
The times that we had
we'll keep like a photograph.
For us the world just opens up,
but it's so hard to say goodbye.
I'm so thankful for the moments,
so glad I got to know you.
I know I'll miss you,
but we'll never fade away.
We have our future in our hands,
and so many plans.
This happy ending is the start
of all our dreams and I know
your heart is with me.

Nika Škerget, Class 9

The end of primary school

First day
in our primary school benches.
Everyone came from different paths.
Different characters and new faces,
but we built bonds
and became real friends.
There were moments of struggle,
but we helped each other when it
was hard.
Primary school, I will miss you
so much,
because of good people
you gave to me.
And after fifty years when I look for
my memories,
I will never be sorry
I attended you.
Teachers and parents,
thank you so much,
for morals, for which we hope
were not in vain.
Nine years have passed up to now,
and new challenges
are waiting for us.

Vesna Ornik, Class 9

Goodbye

I will pack my things and go,
travel the world
before I am old.
Every day is a new day
and every day
has a different way
how to spend it.
Maybe you will see me
in London or Berlin
and maybe you will also
have a long chin.
We can talk about foolish things
and together remember our past.
Time runs
and every morning sun
starts shining.
But we can not stop time
and we can not hide sun.
I am getting older,
older to make decisions
and older to leave
and start to believe
in myself.
But I will never forget
who taught me how to live,
show how to love
and taught me how to give.

Nuša Najdenik, Class 9

We were together for nine years.
We had lots of ups and downs
we went through,
but in every situation
we were friends
that trusted each other.
I'm sure our friendship
will stay forever.

Maja Kukovec, Class 9

<http://goo.gl/R4wL8i>

<https://goo.gl/1B7tA9>

The key for happiness
are dreams.
The key for success is
realizing your dreams.
Me and my classmates are
having our own dreams
and our paths will slowly
separate.
But I hope that we will
always stay friends.

Survivors

All the best memories,
the biggest smiles,
everything because of us.

Every moment in this school,
everything that you don't know,
all the possible mistakes,
are the reason for all of us still stand-
ing there.

New beginning

In the school kids discover
new things.
We know different kinds of school.
Now we are finishing a primary school
and we will go on separate ways.
Our way together is over,
but this is just a beginning.

Helena Šefer, Class 9

<http://goo.gl/YfZMcN>

Daša Dužević, Class 9

The end of the last school year

Everything ends,
a new day and a New year ...
It also ended, our way together.
Time runs fast,
but don't be the last ...
It's like we were 7 years old
yesterday.
Don't forget tomorrow
is the end of our way.
We will never forget the best years,
friends will stay friends forever.
We will see, it is the truth.
Waves will bring the truth tomorrow.

School members

School is over
and our friendships
are like a boulder.
We have to stay together
and only this will count forever.

We have to walk side by side
till our paths are apart.
So let's make it fun
and remember the old times
before we are gone.

So if we've made it here,
we all make it anywhere.
Our friendships, gone like sand
will last till our journeys end.

Sanja Bračić, Class 9

Onwards

A chapter ended at page 9,
seek out great memories
to underline.
So many ways to reach the peak,
the pen is writing as we speak.

School poem

For our work and our play
and the girls and the boys
who in comradeship
share our joys and our fears,
and the hopes for the years
that remain.
So now it's time to say goodbye
to our friends
and to move on.
After many years here
we'll be sad they're gone.

Patricija Kotar, Class 9

<http://goo.gl/odmg1B>

<http://goo.gl/0Chf0l>

Jani Knuplež, Class 9

Ignite all fear that seals your might,
become a fearless knight of light.
We bend space time continuum,
as we march to reach our Supremum.

Filip Senekovič, Class 9

Don't look back because you are not
going that way, so turn around and
face what's coming.

Luka Gomolj, Class 9

Jennifer Lawrence

F A M O U S P E O P L E

About me

Hello my name is Mineja. In past thirteen years I was visiting kindergarten and I have completed all eight grades. In this thirteen years a lot of my habits have changed. I used to ride horses and I used to spend a lot of time outside. These days I just really like to put on some music on my phone and don't think about anything. I'm finishing 9th grade. In about five months me and my classmates are going to have junior prom. At home I'm trying to get used to harder work for school for better grades. I'm not sure which high school I'm going to visit yet. I am deciding between High school for Tourism and Service Jobs and High School for Design.

Who is Jennifer Lawrence

Jennifer was born in Louisville, United States. She is not the only child; she has two older brothers, Ben and Blain. Her mother is an owner of a summer camp. She played a lot in the theatre when she was younger and when she was in high school she also worked in her mother's camp as a nurse assistant.

Jennifer has got two older brothers, Blain and Ben.

When she was fourteen she decided to become an actress. She went to New York City with her parents in order to find an agent for her. Before she became famous she was visiting a high school. She graduated two years before to focus on her career.

She started acting with her first role in comedy series on TV. For this role she got a Young Artist Award. She also had smaller roles in other series. After she got some experiences in acting she got a role in a movie. After a role in Winter's Bone she became very well-known in a movie industry.

The actress in Winter's Bone

The most important roles that make her famous were X-men and Hunger Games where she had a main role.

Jennifer in Hunger Games

She had to shoot 3 more continuations of Hunger Games. All four films were very successful.

One of very important moments in her movie career was when she got an Oscar.

Jennifer Lawrence with her Oscar

In her life some things changed a lot, like people recognise her on streets, she doesn't have her private life any more because of her fans, journalists and paparazzi.

Jennifer is not afraid of the paparazzi.

<http://goo.gl/a6dTVb>

<http://goo.gl/zCa4Ug>

<http://goo.gl/H6lF9a>

<http://goo.gl/CK4vXa>

<http://goo.gl/D6Yanw>

A lot of people think that actors don't work hard, but they do. Jennifer discovered some negative sides of fame and just of being an actress. Because of hard work and continuous pressure she had some panic attacks and she has lost a lot of kilograms. After all she is just a normal girl - like all of us.

Pressure and hard work, a good combination for panic attacks

Interesting facts

When Jennifer's name was called on Oscar ceremony she went on the stage and on the way there she fell.

Jennifer Lawrence's fall

She is also in a video of music group and I was very surprised about that when I found it out.

She put her acting career on hold to direct a film which was her wish for a long time.

Dictionary

pressure - pritisk
devotion - predanost
perseverance- vztrajnost
grade- razred
role - vloga
trailer - napovednik

Mineja Draškovič, Class 9

Paris

INTRODUCING PLACES

Greetings everyone! I am Gašper and today I will present the city of love, also known as Paris. I chose this city mostly because it is one of my favourites, and because me and my family were there five years ago, so I can tell you from the first hand what a great city this is.

Location, size, people and language

Paris, the city of love, lies in the northern east of France. It is the capital of France, but at the same time it is also the biggest French city. A river called Seine splits the city apart on the right and the left hill. The city of Paris has an area of 105 square kilometres. It is not as big as some other capitals, for example London, but compared to our Ljubljana it is still really big. People here are mostly Catholics, there are also many who believe in religion of Islam, or the Jewish. People here speak French, but due to a lot of tourists English is spread, too.

Characteristics

Paris is known for many things, from food all the way to sport. Let me start with clothes: the most famous piece of clothing here is a world-known hat - a beret. Looking at the city from far away, one can immediately say that this is one of the most well-fashioned cities in the world. It is the centre of the world fashion and they have fashion weeks all year long.

<http://goo.gl/5NOZul>

A famous piece of clothing, a beret

When you visit Paris, you will see thousands of cafés on the corners and street musicians with accordions playing old french songs.

Moving on to food, you will also smell the aroma of freshly baked bread called baguette. But if you are really hungry and want to try something new, go ahead and eat some cooked snails. Parisians eat more snails than any other nation in the world. If you want to stick to regular food, you can eat some

French cheese. But what is cheese without some wine? A widely known drink here is wine, of course. From Paris - or let's say from France - come the best wines in the world, and lots of wine lovers come to Paris to drink some of this tasteful beverage.

A French baguette

<http://goo.gl/RxHwhg>

If we move on to sports, there is actually only one typical old sport, 'boules'. It is mostly played by elders in the sunny afternoons, but there are also world championships for this sport.

Favourite pets in Paris are dogs. An interesting fact is that every sixth Parisian has a dog. Dogs are so popular here that there are taxi companies offering services only for dogs and there are even luxurious hotels for dogs, man's best friend!

Sights to visit

In Paris there are just too many sights to be visited, so I will only list some of the most famous ones. First, there is an art museum that hides the world's most famous sight, the museum Louvre. It is built in a pyramid shape and it stretches underground for miles. The most famous piece of art everybody wants to see is of course Mona Lisa. It was painted by Leonardo Da Vinci, and every year millions of people come here to see her smile. Some people say that - no matter where you are standing - you have a feeling she is watching you. I also saw the painting and have to admit her smile is really mysterious. In this museum there are also a lot of other pieces of art.

Next we have the world's most known tower, the Eiffel tower. My family and me went to see it, but we didn't go to the top because there were so many people waiting, so we would be waiting there for hours. The tower is really enormous, in reality it is even more fascinating than it is in the photos. It was originally built for a world exhibition in year 1889 and it became the most idolic statue of Paris.

Eiffel Tower

http://goo.gl/blaczm

Notre Dame, the famous Parisian church

Au revoir!

In Paris there is much more to see, smell, try and experience. There is a part of the city around the Moulin Rouge, where the world-known can can dance was performed at the same time as the Eiffel tower was built.

Now I have something for those Disney fans or people who just enjoy a fun ride on mini trains. It is Disney Land, the only of its kind in Europe. I was there with my family - and honestly - I could spend a few days there. We had the most fun in the haunted house, where we had a scary ride in an armchair. It was a really fun experience. There are also many things to see for history enthusiasts, e.g. Arc de Triomphe. It was built by Napoleon to celebrate his battles, but it took workers so long to build it that Napoleon had died before he saw it. Fortunately, the next king let the workers finish the Arc. This place is also the biggest roundabout in the world, with 12 exports.

One of the most famous churches in the world also stands in Paris. It is the church called Notre Dame. It is famous for many reasons, one of them are grooved monsters sitting on the roof to protect the church from evil. This church is even more visited than the Eiffel tower.

There is one more unique thing you can do in the city of love - if you have already found your soulmate - you can go to the city bridges across the river Seine and put a lock with your and your partner's name on the fence, then throw the key in the river. This is believed to seal your love. Now, isn't that sweet?

Moulin Rouge

http://goo.gl/xZ11hp

There are thousands of romantic places all around the city. Even more, there is a wild mixture of different cultures and various colours of human skin. This is the city to enjoy life and celebrate love! At least for a day or two everyone should be a part of it. See you there - Au revoir!

Pastry

E
M
M
U
Y

Apple pie

INGREDIENTS:

dough
350 grams of flour
a half bag of baking powder
a bag of vanilla sugar
120 grams of sugar in powder
150 grams of butter
2 yolks
4 spoons of sour cream

STUFFING:

apples
80 grams of sugar
a spoon of breadcrumbs
a pinch of cinnamon

INSTRUCTIONS:

Sieve flour and baking powder on a work surface. Add margarine or butter, sugar, vanilla sugar, egg yolks and sour cream and knead dough. The dough should rest for a little to be cool. Meanwhile make the apple filling. Grate apples, add sugar, cinnamon and bread crumbs. Divide the dough into two parts and roll out. Place the first layer in a baking tray, stuff with apple filling and cover with another layer. Bake it at 180 degrees for about 60 minutes.

<http://goo.gl/hFol94>

Simon Špindler, Class 7

Cookies

INGREDIENTS:

1 egg
100 grams of butter
100 grams of sugar
250 grams of flour
100 grams of chocolate

INSTRUCTIONS:

Mix eggs and sugar. Add baking powder. Pour butter and add flour into the mixture. Finally add

chopped chocolate. Design the cookies. Bake them for 15 minutes at 160 degrees Celsius.

<https://goo.gl/ESNTTw>

Katja Šnajder, Class 7

Kinder milk slices

INGREDIENTS:

3 eggs
60 grams of chocolate in powder
30 grams of sugar in powder
a packet of vanilla sugar
a packet of sweet cream
2,5 dl of cold milk
2 bags of "gelatina fix"
a packet of lemon sugar
*If you want: honey or chocolate for covering

INSTRUCTIONS:

Preheat the oven at 180 degrees. Crush the eggs and separate the egg white and the yolk. Mix the egg whites with a bit of sugar in powder in a bowl to make "snow". Mix the yolk, sugar and vanilla sugar in the second bowl. Add the chocolate in powder and mix it all together. Add the snow with a spoon and meanwhile mix it. Put the mixture in a baking tray. Bake it for 6 minutes. When the dough cools down, prepare the cream: make the sweet cream with cold milk and mix it with the lemon sugar; add "gelatina fix". First cover a half of dough with the cream, then the second half of it.

<https://goo.gl/GvCkz>

Wait for 30 minutes until kinder milk slices are cool.
Enjoy it!

Nika Gamser, Class 7

Coconut cake

INGREDIENTS:

2 cups all-purpose flour
1 tablespoon baking powder
1 teaspoon salt
1 cup butter, room temperature
2 cups white sugar
5 eggs, room temperature
1 teaspoon coconut extract
1 cup buttermilk, room temperature
1 cup flaked coconut

INSTRUCTIONS:

Preheat the oven up to 175 degrees. Grease and flour a 10-inch tube pan. Mix flour, baking powder and salt together and set aside. Beat butter and sugar with an electric mixer in a large bowl until light and fluffy. The mixture should be noticeably lighter in colour. Add the room-temperature eggs one at a time, allowing each egg to blend into the butter mixture before adding the next. Mix in coconut extract. Pour in the flour mixture alternately with the buttermilk, mixing until just incorporated. Fold in coconut, mixing just enough to evenly combine. Pour the batter into prepared pan. Bake at 175 degrees for 1 hour, or until a toothpick inserted into the cake comes out clean.

<http://goo.gl/fKdX68>

Nuša Urbanič, Class 7

During our English lessons with the second graders we talked about food and drinks, what is healthy and what is unhealthy. After that, we decided to make some crafts on food, too. We 'baked' pizza and prepared a healthy salad. Pupils were extremely creative, they turned into real chefs :) They had fun decorating their own pizzas with their favorite toppings and enjoyed crafting.

Choose a pizza crust (a). Glue red paper sauce on it (b).

a)

b)

Glue shredded cheese.

Do you want to 'bake' your own pizza, too? Easy! Read the instructions below :)

Materials:

- tan, red, white, yellow, green, and black construction paper
- glue
- scissors

Add your favourite toppings.

Photos: Aleksandra Žnuderl

Directions:

Begin by gathering all of your materials. Cut out each of the pieces for your pizza. You will need large tan circles for the crust, wiggly smaller circles for the sauce, yellow and/or white strips of paper for cheese, and then various toppings for green peppers, black olives, mushroom, and pepperoni.

Done!

Ich und meine Familie

OUR GERMAN FRIENDS

Beziehung zwischen den Kindern und Eltern

Die Beziehung zwischen Freddy, Mia und ihren Eltern ist sehr gut. Sie sprechen liebevoll und freundlich miteinander. Manchmal sind sie auch gemein.

Eine Beziehung zwischen den Eltern und Kindern ist sehr wichtig. Wenn sich die Kinder und Eltern nicht verstehen, gibt es ein großes Problem. Die Kinder sind gemein zu ihren Eltern, sie schreien aufeinander. Das kann zur Schlägerei, körperliche oder psychische Gewalt führen.

<http://goo.gl/Am1Aqc>

Es ist nicht nötig, dass die Eltern ideal sind, dass ihre Kinder immer zufrieden sind. Die Kinder müssen auch gut und brav sein. Die meisten Macht haben die Eltern, die Kinder nur so viel, wie viel die Eltern ihnen zulassen.

<https://goo.gl/UCgqOz>

Die Beziehung muss sicher sein. So wie die Beziehung zwischen der Familie Moll.

Sie sind eine fröhliche Familie. Sie Freddy liebt ihre Familie über alles, verlassen sich auf einander und lieben sie. Sie vertrauen sich alles.

<http://goo.gl/U2uKCe>

Eine Beziehung zwischen den Eltern und Kindern ist sehr wichtig.

Was Kinder brauchen...

Anja Krautič, 9. Klasse

Ich, meine Familie und Berufe

Hallo. Mein Name ist Gregor Sulcer. Ich wohne mit meiner Familie in Sp. Jakobski Dol 34A. Das liegt in Nord-ost Slowenien. Ich bin 16 und besuche die Grundschule Jožeta Hudalesa Jurovski Dol und ich bin in der 9. Klasse. Ich bin groß und dünn. Ich habe braune Haare und braune Augen. Mein Hobby ist Fußball spielen. Ich bin sehr sportlich und kreativ. In meiner Freizeit höre ich Musik, surfe im Internet, spiele Fußball oder Computer. Das mache ich in meinem Zimmer. Das Zimmer ist sehr groß. Es ist grün, braun und weiß. Drin gibt es ein Bett, einen Kleiderschrank und einen Schreibtisch. Das Bett ist rechts an der Wand. Der Schreibtisch ist zwischen dem Bett und Kleiderschrank.

Mein Vati Vlado ist fleißig. Er ist 45 Jahre alt. Sein Hobby ist Fußball spielen. Meine Mutti Jelka ist Krankenschwester von Beruf und sie arbeitet in Lenart. Sie ist sehr lustig und intelligent. Mein Bruder Domen besucht die 7. Klasse. Er mag fernsehen. Mein Bruder Primož ist der jüngste in unserer Familie. Er ist 9 Jahre alt. Er mag FIFA spielen.

Ich werde Goran Dragić vorstellen. Er ist ein Sportler und Basketball Spieler. Ich finde die Arbeit eines Basketballspielers schwer aber lustig und gut bezahlt. Goran ist 29 Jahre alt. Er hat am 6. Mai Geburtstag. Er kommt aus Slowenien aber jetzt wohnt er in Miami in den Vereinigten Staaten. Goran Dragić ist mit Maja verheiratet. Sie haben 2 Kinder: Mateo und Victoria. Goran arbeitet im Miami Heat, das ist ein Basketball Klub im NBA Liga. Er spielt in der Ver-

teidigung. Für seinen Beruf braucht er ein Paar Basketballschuhe, einen Basketball, Mitspieler und Gegner natürlich.

<http://goo.gl/mrPLgc>

Goran Dragić, ein Sportler und Basketball Spieler

Im Vergleich mit diesen Beruf finde ich den Beruf einer Krankenschwester schwerer und schlechter bezahlt.

Ich besuche die Volksschule J. Hudalesa. Sie liegt im Zentrum von Jurovski Dol. Die Schule besuchen ungefähr 190 Kinder.

In meiner Klasse gibt es 25 Schüler. Ich mag Englisch, Geschichte und Sport. Frau Antonija Širec ist unsere Mathe Lehrerin, Frau Irena Kocbek lehrt uns Deutsch. Unsere Klassenlehrerin ist Frau Majda Kolarič.

Nächstes Jahr werde ich SERŠ Gymnasium in Maribor besuchen. Im Juli und im August werde ich zu Hause bleiben und die Sommerferien mit den Freunden verbringen.

Im Jahr 2030 werde ich meine eigene Familie haben und ich werde ein Ingenieur von Beruf sein. Ich werde auch ein schönes Auto haben.

<http://goo.gl/Hjgwgt>

Schottisches Hochlandrind

Ich stelle Schottisches Hochlandrind vor. Das ist eine Rasse des Hausrindes. Sie kommen aus Schottland, aus Schottisches Hochland. Sie sind das älteste Rind in Europa.

Ich habe diese Tiere ausgewählt weil wir sie zu Hause haben und weil sie interessant sind.

Sie verbringen die ganze Zeit auf der Weide. Sie fressen Gras, Äpfel, Heu und sie trinken Wasser. Diese Tiere produzieren Rindfleisch.

Schottisches Hochlandrind

Sie haben 2 Augen, die Zunge, 2 Hörner, das Fell, 2 Ohren und den Schwanz. Die Hörner können bis 1,60 m lang wachsen. Ihr Fell ist sehr lang und winterfest. Regen und Wind können durch den Naturpelz nicht durchdringen. Auch Schnee bleibt an dem isolierten Haarkleid liegen. Sie brauchen keinen Stall. Sie sind braun, weiß oder schwarz.

Sie leben ungefähr 20 Jahre.

Bad Radkersburg

Die Siedlung unten dem Schloss war schon im 12. Jahrhundert bekannt, im Jahr 1265 als der Platz und im Jahr 1299 schon als die Stadt. Slowenischer Name „Radgona“ an dem anderen Berg des Flusses Mur (Petersdorf) war im 13. Jahrhundert die Vorstadt.

Bad Radkesburg ist eine historische Stadt. Die Entdeckung von heißen Quellen und Heilwasser halfen, dass die Stadt bereits im Jahr 1978 die Therme eröffnet.

Bad Radkersburg liegt in der Nähe von Ungarn und Kroatien.

Bad Radkersburg

Die Stadt ist ein idealer Ausgangspunkt für einen Tagesausflug in die Weinbaugebiete der Nachbarländer oder in die slowenische Landeshauptstadt Marburg.

Die südländisch anmutende Stadt besitzt viele kulturelle und gastronomische Höhepunkte.

Man findet hier architektonische Kostbarkeiten wie Arkadenhöfe, Torbögen, aber auch schattige Gastgärten, wo man die hervorragenden Speisen und Weine der Region genießen kann.

Die Region Bad Radkersburg ist immer eine Reise wert.
